

Do antibiotics have side effects?

**BE
ANTIBIOTICS
AWARE**
SMART USE, BEST CARE

Any time antibiotics are used, they can cause side effects. However, antibiotics can save lives. When you need antibiotics, the benefits outweigh the risks of side effects. If you don't need antibiotics, you shouldn't take them because they can cause harm.

Common side effects of antibiotics include:

Rash

Dizziness

Nausea

Yeast Infection

Diarrhea

Get immediate medical help if you experience severe diarrhea. It could be a symptom of a ***C. difficile* infection** (also called ***C. diff***), which can lead to severe colon damage and death. People can also have severe and life-threatening allergic reactions.

If you experience side effects, follow up with your healthcare professional.

To learn more about antibiotic prescribing and use, visit www.cdc.gov/antibiotic-use or call 1-800-CDC-INFO.

1 out of 5

medication-related visits to the emergency room are from reactions to antibiotics.
