

## Erratum

### Vol. 71, No. 13

In the report “Notes from the Field: Xylazine-Related Deaths — Cook County, Illinois, 2017–2021” on page 503, the second paragraph of the second column should have read, “A total of **210** xylazine-associated deaths were reported during the study period. Xylazine-associated deaths increased throughout the study period; incidence peaked during **October 2021** (Figure). The percentage of fentanyl-associated deaths involving xylazine also increased throughout the study period, rising to a peak of **12.2%** of

fentanyl-related deaths assessed by the Cook County Medical Examiner’s Office during October 2021. Fentanyl or fentanyl analogs were detected on forensic testing in most xylazine-involved deaths (**99.1%**). Other common co-occurring substances included diphenhydramine (**78.1%**), cocaine (**41.9%**), and quinine (**33.8%**). Naloxone was detected in **33.3%** of xylazine-associated deaths.”

The figure on page 503 was updated accordingly.

**FIGURE. Number of xylazine-involved deaths (A) and percentage of fentanyl-involved deaths with detectable xylazine (B), by month — Cook County, Illinois, 2017–2021**
