Definition: Up to Date with COVID-19 Vaccines

Individuals are considered up to date in two cases*:

1. An individual received all recommended doses in their **primary vaccine series** and received **one or more booster dose(s)**. An individual does not need to receive a second booster dose to be considered up to date at this time.
2. An individual received all recommended doses in the **primary vaccine series** but is **not yet eligible for a booster dose**. Individuals who are **not yet eligible** to receive a booster dose include:
 - a. Those who received their **second dose** of a 2-dose primary series of an mRNA COVID-19 vaccine (Pfizer-BioNTech or Moderna) **less than 5 months ago**.
 - b. Those who received a single dose of **Janssen less than two months ago**.

*Individuals with a moderately to severely immunocompromising condition are considered up to date in the following cases:

- 1) An individual received an additional dose less than three months ago if primary series was the Moderna or Pfizer-BioNTech COVID-19 vaccine;
- 2) An individual received an additional dose less than two months ago if primary series was the Janssen COVID-19 vaccine; or
- 3) An individual received one or more booster dose(s) after receiving an additional dose.
