

Line Listing: Procedures Excluded from the SIRs

Updated December 2023

Description

For the surgical site infections (SSI) module, there are inclusion and exclusion criteria that are applied to procedures and associated events. The line list of procedures excluded from the standardized infection ratio (SIR) is an NHSN analysis report that is intended to assist users in reviewing the procedures that are excluded from the SIRs and the reasons for the exclusion. This list of exclusion criteria is often called the universal exclusion criteria and applies to procedures, regardless of the SSI model. Often, the reason for procedure exclusion from the SIRs is due to data quality issues, which can be addressed, if applicable. For a list of exclusion criteria, please see the SSI section of the NHSN Guide to the SIR": <https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf>.

The purpose of this quick reference guide (QRG) is to describe how to determine procedures excluded from the SIRs. The line list will allow for a record-level review of each procedure excluded from one or more SIRs and the reason(s) for the exclusion. If a procedure is excluded from one or more SIRs, any SSI associated with that procedure will also be excluded.

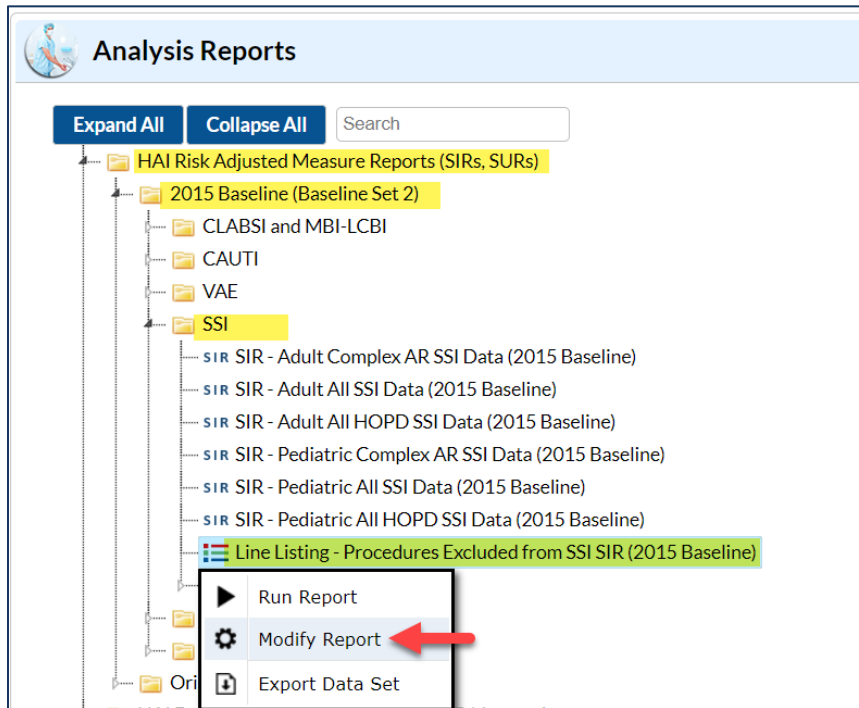

In this example, we are interested in reviewing procedures that were performed in our facility in July 2023.

Step 1: Select the Line Listing – Procedures Excluded from SIR report

Once selected, click “Modify Report” on the pop-up menu.

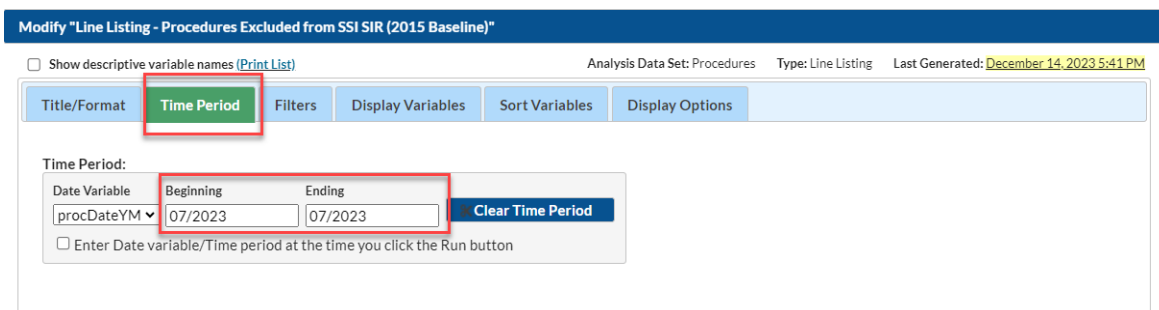

Line Listing: Procedures Excluded from the SIRs

Updated December 2023

Step 2: Modify the report by defining the appropriate criteria

- The title and format of the report can be modified, as needed for your analysis. *This step is optional.*
- Define the time period. For this example, the time period is set to July, 2023 using the procedure date (i.e., procDateYM).

- Filters can be included to this report to limit the amount of data to display in the report output. We recommend the use of these filters when interested in analyzing data for a specific procedure category, SIR model, and/or reason for exclusion. For example, the July 2016 list of excluded procedures can be limited by defining a specific procedure code, such as "proccode equal to COLO"

Updated December 2023

- On the Display Variable tab, you will find the list of exclusion variables included in the Selected Variable list by default as shown in the screen shot below. The list of exclusion is explained by the table below.

Modify "Line Listing - Procedures Excluded from SIR"

Show descriptive variable names (Print List) Analysis Data Set: Procedures Type: Line Listing Data Set Generated On: 12/11/2016 10:25:00

Tabbed interface: Title/Format | Time Period | Filters | **Display Variables** | Sort Variables | Display Options

Display Variables:

Available Variables:	Selected Variables:
ageAtProc	procCode
all_incomplete	procDate
anesthesia	bs2_allAdultExcl
approach	bs2_allPedExcl
approachDesc	bs2_cmpxAdultExcl
asa	bs2_cmpxPedExcl
asaDesc	bs2_cmpx30dExcl
birthWt	exclMissingVarInd
birthWtCode	exclMissingVarList
birthWtCodeDesc	exclDurThresholdInd
bldLoss	exclAgeGT109Ind
BMI_val	exclOutpatientInd
CCN	exclGenderOth
closure	exclInvalidJointRepHemi
closureDesc	exclBMIThresholdInd

Buttons: All >>, Selected >, < Selected, << All

Buttons: ^ Up, v Down, ↶ Undo

Callout: Included on the Selected Variable list by default

Buttons: ▶ Run, Save..., Export..., Close

- Once you are satisfied with the selected modifications, click run (or export) to obtain the results

Updated December 2023

Step 3. Report Output and Interpretation

Below is the report output from the Line Listing – Procedures Excluded from SIR report. In the highlighted title of the report, you will notice the applicable baseline year in parenthesis. The list of universal exclusion criteria variables are preceded by **excl**. As mentioned above, these variables, highlighted in yellow shown by the screen shot below, will appear in the Selected Variable and therefore the report output by default. Our report shows that 2 COLO procedures are excluded from the SIR. When we review the exclusion variables (i.e., those beginning with **excl**), we can see that these procedures are excluded from the SIRs because they are outpatient procedure (i.e., **exclOutpatientInd = Y**). The outpatient procedures are separated from the inpatient procedures, thus any outpatient procedure will be excluded from the inpatient SIR reports.

National Healthcare Safety Network
Line Listing for Procedures Excluded from SSI SIR (2015 Baseline)
 As of: December 14, 2023 at 10:59 PM
 Date Range: PROCEDURES procDateYM 2023M07 to 2023M07
 if (((excluded = "Y")))

This report is based on the 2015 baseline and the corresponding exclusion criteria for that baseline

orgID	patID	procID	procCode	bs2_allA dultExcl	bs2_allPedE xcl	bs2_cmpxA dultExcl	bs2_cmp xPedExcl	bs2_cmp x30dExcl	procDate	dob	gender	procDura tionHr	procDura tionMin	exclMissi ngVarInd	exclMissi ngVarList	exclDurThr esholdInd	exclAgeG T109Ind	exclOutp atientInd	exclPedin dcmpx30d	exclGender Oth	exclInvalidJoi ntRepHemi	exclBMIThresho ldInd	excluded
15731	100231	114911	COLO	1	1	1	1	1	7/29/2023	9/11/1971	F	12	34	N		N	Y	N	N	N	N	N	Y
15731	100232	114935	COLO	1	1	1	1	1	7/6/2023	7/30/1971	F	1	22	N		N	Y	N	N	N	N	N	Y

The following footnotes apply to the 2015 Baseline only.

1. The "Line Listing for Procedures Excluded from SSI SIR (2015 Baseline)" report contains procedures excluded from one or more SIRs.
2. Variables preceded by **excl** indicate the reason for exclusion. If **excl** criterion is set to Y, then the procedure is excluded from the denominator of the related SIR.
3. Please review the Quick Reference Guide on Procedure Exclusion Criteria (<https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/line-list-procedures-excluded-sir.pdf>) for more information on how to determine which records are included in the SIRs.
4. The variable indicating procedures excluded from the CMS IQR program SIR is **bs2_cmpx30dExcl**; it applies to COLO and HYST only.

Data contained in this report were last generated on December 14, 2023 at 5:38 PM to include data beginning January 2022 through December 2023 .

Please review the footnotes for additional information

Updated December 2023

Definitions of Exclusion Variables

Below is the list of exclusion variables and their corresponding definitions. If any of the exclusion variables, preceded by **excl** is set to 'Y' (Yes), as shown in the report output above, then the procedure is excluded from the SIR. And if any of the exclusion variable is set to 'Y', then the variables followed by 'Excl' will be set to 1, as shown in the report output above. This simply means that the procedure is excluded from the SSI SIR model(s).

Exclusion Variable	Definition
bs2_allAdultExcl	Procedure excluded from All SSI SIR Model-Adult
bs2_allPedExcl	Procedure excluded from All SSI SIR Model-Pediatric
bs2_cmpxAdultExcl	Procedure excluded from Complex AR SSI SIR Model-Adult
bs2_cmpxPedExcl	Procedure excluded from Complex AR SSI SIR Model-Pediatric
bs2_cmpx30dExcl	Procedure excluded from Complex 30-day SSI SIR Model
exclMissingVarInd	Procedure excluded for missing risk factors used in risk adjustment of applicable procedure category for SSI models
exclMissingVarList	List of missing risk factors used in risk adjustment of applicable procedure category for SSI models
exclDurThresholdInd	Procedure excluded due to procedure duration being less than 5 minutes or exceeding the IQR5 value. Please see the list of procedure duration cutoff points in the new SIR Guide: https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf
exclAgeGT109Ind	Procedure excluded if the patient's age at time of procedure is 109 years or older
exclOutpatientInd	Procedure excluded because it was reported as an outpatient procedure; NOTE: all outpatient procedures are excluded from the SSI SIRs calculated using the 2015 baseline
exclPedIndcmpx30d	Procedures performed in pediatric patients are excluded from the Complex 30-day model
exclGenderOth	Procedure excluded because patient's gender was not reported as male or female (i.e., gender = 0)
exclInvalidJointRepHemi	Procedure is excluded if procedure code is KPRO or HPRO and (jntRepHemi=totrev or jntRepTot=partrev) (and procedure date is January 1, 2015-December 31, 2015).
exclBMIThresholdInd	Procedure excluded if the adult patient's BMI is less than 12 or greater than 60. In pediatric patients > 18 years if BMI is less than 10.49 or greater than 65.79**

**This BMN exclusion applies to all procedures on pediatric patients, in both applicable SSI models (All SSI and Complex A/R). CDC Growth Charts are used to assess BMI in pediatric patients, calculated using height, weight, age and gender. More information can be found here:
