Sterile gloves	Sterile gloves	Sterile gloves	barrierGloves
Sterile gown	Sterile gown	Sterile gown	barrierGown
Cap	Cap	Cap	barrierCap
Mask worn	Mask worn	Mask worn	barrierMask
Large sterile drape (a large sterile drape covers the patient’s entire body)	Large sterile drape (a large sterile drape covers the patient’s entire body)	Large sterile drape (a large sterile drape covers the patient’s entire body)	barrierDrape

NOTE: The Food and Drug Administration (FDA) has labeled CHG to be used with care in premature infants and infants <2 months of age. Acceptance of CHG use for adherence to the CLIP bundle in this patient population does not reflect a recommendation of its use by the NHSN.

*Adherence to a bundle requires a “Yes” to all of these criteria.
